

Optimising treatment in ulcerative colitis patients

Lessons from clinical trials and real-world evidence

Proudly brought to you by Pfizer Australia

INVITATION TO THE PFIZER DINNER SYMPOSIUM

A 60-minute dinner presentation at AGW following the President's Welcome
Saturday 2 September 2023, 7.00 pm

Meeting Room: Plaza P1, Brisbane Convention & Exhibition Centre

Also available online at 7.00 pm (QLD, NSW, VIC), 6.30 pm (SA), 5.00 pm (WA),

Optimising therapy in UC patients

Part 1 examines the current treatment landscape for UC, navigating the guideline updates for JAK inhibitors and the selection of appropriate UC patients for treatment.

The UC patient and patient-reported outcomes

Part 2 includes a UC patient case with a focus on the clinical trial and real-world evidence that demonstrates the impact of UC on health-related quality of life.

The unmet need in UC patients

Part 3 explores the current unmet needs and future treatments and treatment strategies in UC.

Presenters:

A/Prof Miles Sparrow, The Alfred Hospital, Melbourne and Monash University, VIC

A/Prof Peter De Cruz, Austin Hospital, Melbourne and University of Melbourne, VIC

Your Presenters

A/Prof Miles Sparrow is a gastroenterologist specialising in inflammatory bowel disease (IBD). He is Director of the IBD Unit at The Alfred Hospital, Melbourne and Adjunct Clinical Associate Professor at Monash University, VIC.

His research interests include use and optimisation of immunomodulators, therapeutic drug monitoring, novel E-Health models of care in IBD and clinical trials of novel experimental agents in IBD. He is a member of the Australian-IBD Association, IBD-Melbourne and BRIDGe IBD special interest groups, and is a faculty member of the Cornerstones IBD medical education program.

A/Prof Peter De Cruz MBBS, Ph.D, FRACP

Peter De Cruz is Director of the IBD service at the Austin Hospital and Associate Professor at the University of Melbourne, VIC.

Peter's ongoing clinical research interests include the optimal management of acute severe ulcerative colitis, perioperative management of IBD, identifying predictive biomarkers of response to IBD therapeutics, quality assurance and eHealth in IBD.
